re: Paleontological resources for the Allen/Cataract Warehouse Project (# 7091)

Dear Megan:

I have conducted a thorough search of our paleontology collection records for the locality and specimen data for proposed development at the Allen/Cataract Warehouse project area as outlined on the portion of the San Dimas USGS topographic quadrangle map that you sent to me via e-mail on November 17, 2021. We do not have any fossil localities that lie directly within the proposed project area, but we do have fossil localities nearby from the same sedimentary deposits that occur in the proposed project area, either at the surface or at depth.

The following table shows the closest known localities in the collection of the Natural History Museum of Los Angeles County.

| Locality Number | Location | Formation | Таха | Depth |
|--------------------|--|---|--|-----------------|
| LACM VP | | | Mako shark (<i>Isurus planus</i>), | |
| 6167, 6173; | | | Extinct bony fish (<i>Etringus</i>); | |
| LACM IP 4723 | Puddingstone Dam | Puente Formation | invertebrates | Unknown |
| LACM VP | | | Sturgeonfish (Prionurus), | |
| 6166, 6172, | Bonelli Regional | | Mola (Molidae), other unidentified | |
| 7471 | County Park | Puente Formation | fish | surface |
| | W of intersection of | Unknown (light brown shale with interbeds of very | | |
| LACM VP 1728 | English Rd & Peyton Dr, Chino | coarse brown sand; Pleistocene) | Horse (<i>Equus</i>), camel (<i>Camelops</i>) | 15-20 ft bgs |
| | Near intersection of Vellano Club Dr. and Palmero Dr., Oakcrest | | | |
| | Development; N of | | Ground sloth (Nothrotheriops); | |
| | Serrano Canyon, | Unknown formation | elephant family (Proboscidea); | |
| LACM VP 7508 | Chino Hills | (Pleistocene) | horse (Equus) | Unknown |
| | Sundance | | | |
| LACM VP | Condominiums, S of | Unknown | | |
| 7268, 7271 | Los Serranos Golf | (Pleistocene) | Horse (<i>Equus</i>) | Unknown |

Course VP, Vertebrate Paleontology; IP, Invertebrate Paleontology; bgs, below ground surface

This records search covers only the records of the Natural History Museum of Los Angeles County ("NHMLA"). It is not intended as a paleontological assessment of the project area for the purposes of CEQA or NEPA. Potentially fossil-bearing units are present in the project area, either at the surface or in the subsurface. As such, NHMLA recommends that a full paleontological assessment of the project area be conducted by a paleontologist meeting Bureau of Land Management or Society of Vertebrate Paleontology standards.

Sincerely,

Alyssa Bell
