## Executive Summary

---

The City of San Dimas engaged Willdan Financial Services (Willdan) to determine the full costs incurred by the City to support the various activities for which the City charges user fees. Due to the complexity and the breadth of performing a comprehensive review of fees, Willdan employed a variety of fee methodologies to identify the full costs of individual fee and program activities. This report and the appendices herein identifies 100% full cost recovery for City services and the recommended level of recovery as determined through discussion with departmental staff.

The reality of the local government fee environment is that significant increases to achieve 100% cost recovery can often not be feasible, desirable, or appropriate depending on policy direction —particularly in a single year. The recommended fees identified herein are either at or less than full cost recovery.

---

# User Fee Background

---

## Background

As part of a general cost recovery strategy, local governments adopt user fees to fund programs and services that provide limited or no direct benefit to the community as a whole. As cities struggle to maintain levels of service and variability of demand, they have become increasingly aware of subsidies provided by the General Fund and have implemented cost-recovery targets. To the extent that governments use general tax monies to provide individuals with private benefits, and not require them to pay the full cost of the service (and, therefore, receive a subsidy), the government is limiting funds that may be available to provide other community-wide benefits. In effect, the government is using community funds to pay for private benefit. Unlike most revenue sources, cities have more control over the level of user fees they charge to recover costs, or the subsidies they can institute.

Fees in California are required to conform to the statutory requirements of the California Constitution, Proposition 218, and the California Code of Regulations. The Code also requires that the City Council adopt fees by either ordinance or resolution, and that any fees in excess of the estimated total cost of rendering the related services must be approved by a popular vote of two-thirds of those electors voting because the charge would be considered a tax and not a fee.

## California User Fee History

Before Proposition 13, California cities were less concerned with potential subsidies and recovering the cost of their services from individual fee payers. In times of fiscal shortages, cities simply raised property taxes, which funded everything from police and recreation to development-related services. However, this situation changed with the passage of Proposition 13 in 1978.

Proposition 13 established the era of revenue limitation in California local government. In subsequent years, the state saw a series of additional limitations to local government revenues. Proposition 4 (1979) defined the difference between a tax and a fee: a fee can be no greater than the cost of providing the service; and Proposition 218 (1996) further limited the imposition of taxes for certain classes of fees. As a result, cities were required to secure a supermajority vote in order to enact or increase taxes. Since the public continues to resist efforts to raise local government taxes, cities have little control and very few successful options for new revenues. Compounding this limitation, the State of California took a series of actions in the 1990's and 2000's to improve the State's fiscal situation—at the expense of local governments. As an example, in 2004-05, the Educational Revenue Augmentation Funds (“ERAF”) take-away of property taxes and the reduction of Vehicle License Fees have severely reduced local tax revenues.

In addition, on November 2, 2010, California voters approved Proposition 26, the “Stop Hidden Taxes Initiative”, which is aimed at defining “regulatory fees” as a special tax rather than a fee, thus requiring approval by two-thirds vote of local voters. These regulatory fees are typically intended to mitigate the societal and environmental impacts of a business or person's activities. Proposition 26 contains seven categories of exceptions. The fees analyzed as part of this study fell under categories one through five consisting of charges for specific benefits, government service, regulatory need, for use of government property, or a fine/penalty.

---

## Additional Policy Considerations

The recent trend for municipalities is to update their fee schedules to reflect the actual costs of certain public services primarily benefitting users. User Fees recover costs associated with the provision of specific services benefitting the user, thereby reducing the use of General Fund monies for such purposes.

In addition to collecting the direct cost of labor and materials associated with processing and administering user services, it is common for local governments to recover support costs. Support costs are those costs relating to a local government's central service departments that are properly allocable to the local government's operating departments. Central services support cost allocations were incorporated using the resulting indirect overhead percentages determined through the Cost Allocation Plan. This plan was developed prior to the User Fee study to determine the burden placed upon central services by the operating departments in order to allocate a proportionate share of central service cost.

As labor effort and costs associated with the provision of services fluctuate over time, a significant element in the development of any fee schedule is that it has the flexibility to remain current. Therefore, it is recommended that the City include an inflationary factor in the resolution adopting the fee schedule to allow the City Council, by resolution, to annually increase or decrease the fees.

The City may employ many different inflationary factors. The most commonly used inflator is some form of the Consumer Price Index (CPI) as it is widely well known and accepted. A similar inflator is the implicit price deflator for GDP, which is much like the CPI except that while the CPI is based on the same "basket" of goods and services every year, the price deflators' "basket" can change year to year. Since the primary factor for the cost of a City's services is usually the costs of the personnel involved, tying an inflationary factor that connects more directly to the personnel costs can be suitable if there is a clear method, or current practice of obtaining said factor.

Each City should use an inflator that they believe works the best for their specific situation and needs. It is also recommended that the City perform this internal review annually with a comprehensive review of services and fees performed every three to five years, which would include adding or removing fees for any new or eliminated programs/services.

---

## Study Objective

---

As the City of San Dimas seeks to efficiently manage limited resources and adequately respond to increased service demands, it needs a variety of tools. These tools provide assurance that the City has the best information and the best resources available to make sound decisions, fairly and legitimately set fees, maintain compliance with state law and local policies, and meet the needs of the City administration and its constituency. Given the limitations on raising revenue in local government, the City recognizes that a User Fee Study is a very cost-effective way to understand the total cost of services and identify potential fee deficiencies. Essentially, a User Fee is a payment for a requested service provided by a local government that primarily benefits an individual or group.

The total cost of each service included in this analysis is based on the full cost of providing City services, including direct salaries and benefits of City staff, direct departmental costs, and indirect costs from central service support. This study determines the full cost recovery fee for the City to provide each service; however, each fee is set at the City's discretion, up to 100% of the total cost, as specified in this report.

The principal goal of the study was to help the City determine the full cost of the services that the City provides. In addition, Willdan established a series of additional objectives including:

- Developing a rational basis for setting fees
- Identifying subsidy amount, if applicable, of each fee in the model
- Ensuring compliance with State law
- Developing an updatable and comprehensive list of fees
- Maintaining accordance with City policies and goals

The study results will help the City better understand its true costs of providing services and may serve as a basis for making informed policy decisions regarding the most appropriate fees, if any, to collect from individuals and organizations that require individualized services from the City.

## Scope of the Study

The scope of this study encompasses a review and calculation of the user fees charged by the following San Dimas departments and fee groups:

- Administration
- Finance – Business License
- Parking Enforcement
- Parks and Recreation
- Planning
- Building
- Golf
- Public Works

---

The study involved the identification of existing and potential new fees, fee schedule restructuring, data collection and analysis, orientation and consultation, quality control, communication and presentations, and calculation of individual service costs (fees) or program cost recovery levels.

## **Aim of the Report**

The User Fee Study focused on the cost of City services, as City staff currently provides them at existing, known, or reasonably anticipated service and staff levels. This report provides a summary of the study results, and a general description of the approach and methods Willdan and City staff used to determine the recommended fee schedule. The report is not intended to document all of the numerous discussions throughout the process, nor is it intended to provide influential dissertation on the qualities of the utilized tools, techniques, or other approaches.

---

# Project Approach and Methodology

---

## Conceptual Approach

The basic concept of a User Fee Study is to determine the “reasonable cost” of each service provided by the City for which it charges a user fee. The full cost of providing a service may not necessarily become the City’s fee, but it serves as the objective basis as to the maximum amount that may be collected.

The standard fee limitation established in California law for property-related (non-discretionary) fees is the “estimated, reasonable cost” principle. In order to maintain compliance with the letter and spirit of this standard, every component of the fee study process included a related review. The use of budget figures, time estimates, and improvement valuation clearly indicates reliance upon estimates for some data.

## Fully Burdened Hourly Rates

The total cost of each service included in this analysis is primarily based on the Fully Burdened Hourly Rates (FBHRs) that were determined for City personnel directly involved in providing services. The FBHRs include not only personnel salary and benefits, but also any costs that are reasonably ascribable to personnel. The cost elements that are included in the calculation of fully burdened rates are:

- Salaries & benefits of personnel involved
- Operating costs applicable to fee operations
- Departmental support, supervision, and administration overhead
- Indirect City-wide overhead costs calculated through the Cost Allocation Plan

An important factor in determining the fully burdened rate is in the calculation of productive hours for personnel. This calculation takes the available workable hours in a year of 2,080 and adjusts this figure to account for calculated or anticipated hours’ employees are involved in non-billable activities such as paid vacation, sick leave, emergency leave, holidays, and other considerations as necessary. Dividing the full cost by the number of productive hours provides the FBHR.

The FBHRs are then used in conjunction with time estimates, when appropriate, to calculate a fee’s cost based on the personnel and the amount of their time that is involved in providing each service.

## Summary Steps of the Study

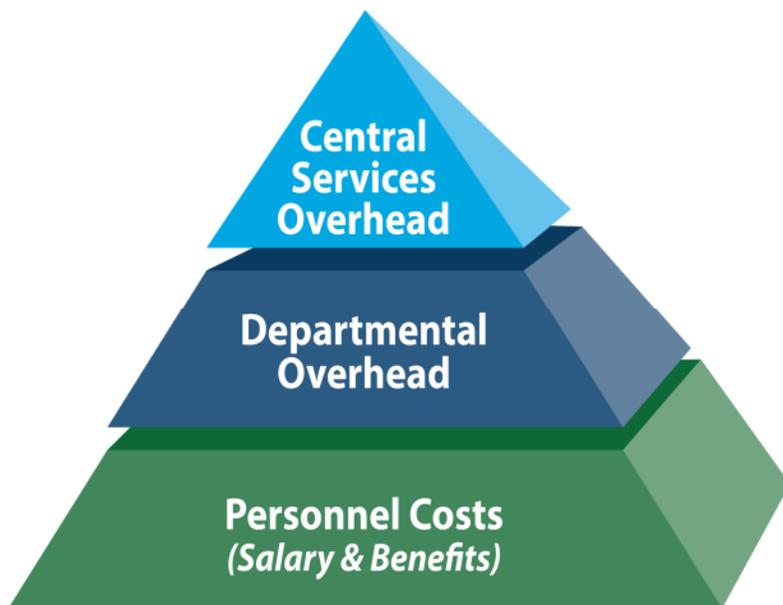

The methodology to evaluate most User Fee levels is straightforward and simple in concept. The following list provides a summary of the study process steps:

## Allowable Costs

This report identifies three types of costs that, when combined, constitute the fully burdened cost of a service (**Appendix A**). Costs are defined as direct labor, including salary and benefits, departmental overhead costs, and the City’s central services overhead, where departmental and central service overhead costs constitute support costs. These cost types are defined as follows:

- **Direct Labor (Personnel Costs):** The costs related to staff salaries for time spent directly on fee-related services.
- **Departmental Overhead:** A proportional allocation of departmental overhead costs, including operation costs such as supplies and materials that are necessary for the department to function.
- **Central Services Overhead:** These costs, detailed in the City’s Cost Allocation Plan, represent services provided by those Central Services Departments whose primary function is to support other City departments.

---

## Methodology

The two methods of analysis for calculating fees used in this report are the:

**Case Study Method (Standard Unit Cost Build-Up Approach):** This approach estimates the actual labor and material costs associated with providing a unit of service to a single user. This analysis is suitable when City staff time requirements do not vary dramatically for a service, or for special projects where the time and cost requirements are easy to identify at the project's outset. Further, the method is effective in instances when a staff member from one department assists on an application, service or permit for another department on an as-needed basis. Costs are estimated based upon interviews with City staff regarding the time typically spent on tasks, a review of available records, and a time and materials analysis.

**Programmatic Approach:** In some instances, the underlying data is not available or varies widely, leaving a standard unit cost build-up approach impractical. In addition, market factors and policy concerns (as opposed to actual costs) tend to influence fee levels more than other types of services. Willdan employed a different methodology where appropriate to fit the programs' needs and goals. Typical programmatic approach cases are facility use fees, penalties, and instances where a program cost is divided over the user base to obtain a per applicant cost for shared cost services.

## Quality Control/Quality Assurance

All study components are interrelated, thus flawed data at any step in the process will cause the ultimate results to be inconsistent and unsound. The elements of our Quality Control process for User Fee calculations include:

- Involvement of knowledgeable City staff
- Clear instructions and guidance to City staff
- Reasonableness tests and validation
- Normalcy/expectation ranges
- Internal and external reviews
- Cross-checking

## Reasons for cost increases/decreases over current fees

Within the fee tables in **Appendix D**, the differences are identified between the full costs calculated through the study and the fee levels currently in effect. The reasons for differences between the two can arise from a number of possible factors including:

- Previous fee levels may have been set at levels less than full cost intentionally, based on policy decisions
- Staffing levels and the positions that complete fee and service activity may vary from when the previous costs were calculated
- Personnel and materials costs could have increased at levels that differed from any inflationary factors used to increase fees since the last study

- 
- Costs that this study has identified as part of the full cost of services may not have been accounted for in a previous study
    - Departmental overhead and administration costs
    - Vehicle and Facility Maintenance support costs
    - Indirect overhead from the Cost Allocation Plan
  - Changes in processes and procedures within a department, or the City as a whole

## City Staff Contributions

As part of the study process, Willdan received tremendous support and cooperation from City staff, which contributed and reviewed a variety of components to the study, including:

- Budget and other cost data
- Staffing structures
- Fee and service structures, organization, and descriptions
- Direct and indirect work hours (billable/non-billable)
- Time estimates to complete work tasks
- Review of draft results and other documentation

A User Fee Study requires significant involvement of the managers and line staff from the departments—on top of their existing workloads and competing priorities. The contributions from City staff were critical to this study. We would like to express our appreciation to the City and its staff for their assistance, professionalism, positive attitudes, helpful suggestions, responsiveness, and overall cooperation.

---

# San Dimas User Fees

---

## Cost Recovery

The cost recovery models, by department/division fee type, are presented in detail in *Appendix D*. Full cost recovery is determined by summing the estimated amount of time each position (in increments of minutes or hours) spends to render a service. Time estimates for each service rendered were predominately determined by Willdan and City Staff through a time and materials survey conducted for each department/division fee included in the study. The resulting cost recovery amount represents the total cost of providing each service. The City's current fee being charged for each service, if applicable, is provided in this section, as well, for reference.

It is important to note that the time and materials survey used to determine the amount of time each employee spends assisting in the provision of the services listed on the fee schedule is essential in identifying the total cost of providing each service. Specifically, in providing services, a number of employees are often involved in various aspects of the process, spending anywhere from a few minutes to several hours on the service.

A primary goal of this study was to identify the cost of City services, to provide information to help the City make informed decisions regarding the actual fee levels and charges. The responsibility to determine the final fee levels is a complicated task. City staff must consider many issues in formulating recommendations, and the City Council must consider those same issues and more in making the final decisions.

City staff assumes the responsibility to develop specific fee level recommendations to present to the City Council. Unfortunately, there are no hard and fast rules to guide the City, since many of the considerations are based on the unique characteristics of the City of San Dimas, and administrative and political discretion. However, in setting the level of full cost recovery for each fee, one should consider whether the service solely benefits one end user or the general community.

## Subsidization

Recalling the definition of a user fee helps guide decisions regarding subsidization. The general standard is that individuals (or groups) who receive a wholly private benefit should pay 100% of the full cost of the services. In contrast, services that are simply public benefit should be funded entirely by the general fund's tax dollars. Unfortunately, for the decision makers, many services fall into the range between these two extremes.

Further complicating the decision, opponents of fees often assert that the activities subject to the fees provide economic, cultural, "quality of life," or other community benefits that exceed the costs to the City.

It is recommended the City consider such factors during its deliberations regarding appropriate fee levels.

Of course, subsidization can be an effective public policy tool, since it can be used to reduce fees to encourage certain activities (such as compliance inspections to ensure public safety) or allow some people to be able to afford to receive services they otherwise could not at the full cost. In addition, subsidies can

---

be an appropriate and justifiable action, such as to allow citizens to rightfully access services, without burdensome costs.

Despite the intent, it is important for the City and public to understand that subsidies must be covered by another revenue source, such as the General Fund. Therefore, the general taxpayer will potentially help to fund private benefits, and/or other City services will not receive funds that are otherwise directed to cover subsidies.

## Impact on Demand (Elasticity)

Economic principles of elasticity suggest that increased costs for services (higher fees) will eventually curtail the demand for the services; whereas lower fees may spark an incentive to utilize the services and encourage certain actions. Either of these conditions may be a desirable effect to the City. However, the level of the fees that would cause demand changes is largely unknown. The Cost of Service Study did not attempt to evaluate the economic or behavioral impacts of higher or lower fees; nevertheless, the City should consider the potential impacts of these issues when deciding on fee levels.

## Summary

If the City's principal goal of this study were to maximize revenues from user fees, Willdan would recommend setting user fees at 100% of the full cost identified in this study. However, we understand that revenue enhancement is not the only goal of a cost of service study, and sometimes full-cost recovery is not needed, desired, or appropriate. Other City and departmental goals, City Council priorities, policy initiatives, past experience, implementation issues, and other internal and external factors may influence staff recommendations and City Council decisions. In this case, the proper identification of additional services (new or existing services) and creation of a consistent and comprehensive fee schedule was the primary objective of this study. City staff has reviewed the full costs and identified the "recommended fee levels" for consideration by City Council. The attached appendices exhibit these unit fees individually.

The preceding sections provide background for each department or division and the results of this study's analysis of their fees. For the full list of each fee's analysis, refer to **Appendix D** of this report.

---

## Administrative

---

The City of San Dimas Administrative Services oversee the city's daily operations, public relations, and finances. Administration also provides internal and centralized services to the Mayor, City Council, and City departments. San Dimas Administration also manages the city's website and social media pages.

## Analysis

Willdan individually reviewed the services associated with the Administrative fees. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of the Administrative services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that most flat rate fees are currently set below the full cost of providing the service. Staff has suggested reasonable fee adjustments to the fee schedule, and they are detailed in **Appendix D**. As a result, there would be:

- An increase for 19 fees,
- 1 fee would decrease;
- 1 new fee, Records Request – Special Request, would be added, and;
- 73 fees would remain as currently set, most related to Animal Control and Waste Management Services as detailed in **Appendix D**.

---

## Finance - Business License

---

A business license is an annual tax required by all businesses doing business within the City of San Dimas. Anyone who operates a business or performs a service within the City of San Dimas is required to apply for and retain a business license, including home occupations and businesses located outside of San Dimas. It must be obtained before any business, profession, trade, or occupation is conducted.

### Analysis

Willdan individually reviewed the services associated with Business License fees. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

Business License serve a revenue generating tax for the City and as such does not generally fall under the purview of a user fee analysis. Along with the business license listing there are two related services that are instead based on the cost of providing service and therefore were included in the analysis. The analysis of the two Business License services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that the two fees are currently set below the full cost of providing the service. Staff has suggested reasonable fee adjustments to the fee schedule, and they are detailed in [Appendix D](#). As a result, there would be:

- An increase to the New Business Listing and Duplicate Licenses;
- Also, an increase to the Credit Card Convenience Fee from 2.36% to 4% based on a program cost analysis, and;
- The remaining taxes would remain as currently set as detailed in [Appendix D](#).

---

# Parking Enforcement

---

The Parking Enforcement division handles overnight parking permits and parking citations. Housing is a great resource for the community to find housing and homeless resources.

## Analysis

Willdan individually reviewed the services associated with the Parking Enforcement fees. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The services included in Parking are a mixture of penalties and user fees. Penalties are set to deter the listed activities, and the analysis of the user fee relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that most flat rate fees are currently set below the full cost of providing the service. The suggested fees in **Appendix D** were set to limit any fee increase to 25% or the full cost (whichever is less) based on the full cost calculation. As a result, there would be:

- an increase to 47 fees;
- 4 new fees would be added, and;
- 19 fees would remain as currently set.

---

## Parks and Recreation

---

The Parks and Recreation Department is responsible for the care and maintenance of all city parks, trees, facilities, as well as for the planning and supervision of a wide variety of recreation programs, activities, and community events.

### Analysis

Willdan individually reviewed the services and programs associated with the Parks and Recreation Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of most Parks and Recreation programs encompassed facility rentals and other recreation services. The fee for use of government owned facilities and property can be set discretionally by the City per Proposition 26 to reduce the cost to the public for related facilities costs, and because there is market availability for facility use elsewhere. The cost of acquisition, maintenance, repair, and upgrade to the City and subsequently the community is partially offset by rental or use fee revenue. As such these fees should be set using the knowledge of activity use for the facilities, policy desires of the City, and market factors when desirable. It is generally accepted that many Recreation programs provide a measure of public benefit to the residents and City as a whole. In addition, cities generally want to ensure that their programs and services remain affordable to the community at large, and that the programs remain competitive with surrounding jurisdictions and private businesses. Therefore, full cost recovery is typically not the primary goal of fee setting. Staff has provided a time and cost analysis of the fees in the schedule to determine a full cost for each line. Staff has suggested reasonable fee adjustments to the fee schedule and they are detailed in [Appendix D](#). As a result, there would be:

- An increase for 162 fees;
- 14 fees would remain as currently set and;
- Overall, the average fee change would be around a 37% increase, as detailed in [Appendix D](#).

---

## Planning

---

The San Dimas Planning Division is responsible for administering the City's development process and developing planning strategies for the future of San Dimas. Planners prepare and monitor the City's General Plan and process applications for development projects.

The department performs current planning, advance planning, and code compliance services. The Planning Division acts as staff to the Planning Commission and the Development Plan Review Board (DPRB). The City Council also utilizes the Planning Department to provide zoning, land use, and urban design analysis.

## Analysis

Willdan individually reviewed the services and programs associated with the Planning Division. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Planning Services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that most flat rate fees are currently set below the full cost of providing the service. Staff has suggested reasonable fee adjustments to the fee schedule, and they are detailed in [Appendix D](#). As a result, there would be:

- an increase to 39 fees;
- 5 new fees would be added;
- 6 fees would change to actual cost from a flat or deposit fee;
- 1 fee would change to flat fee from an actual cost;
- 2 fees would decrease, and;
- 10 fees would remain as currently set.

---

## Building & Safety

---

The San Dimas Building and Safety Division serves as a resource for homeowners, businesses, designers and contractors. The goal of our staff is to help our customers build safe, healthy and sustainable buildings that comply with applicable codes and regulations through performing plan checks, inspections, record maintenance and disaster preparedness. We see ourselves as an integral part of each project team and are committed to establishing positive working relationships with our partners, while focusing on problem solving and delivering exceptional customer service.

The San Dimas Building and Safety Division is responsible for administering and enforcing the California Building Codes and the construction section of the San Dimas Municipal Code to ensure minimum standards to protect life and property.

### Analysis

Willdan individually reviewed the services and programs associated with Building and Safety Division. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

Building and Safety utilizes the Los Angeles County Fee schedule as the basis for fees, so a program cost analysis was performed to determine the cost recovery for services utilizing the cost for services along with historical revenue. The analysis found that the current Building fees on average result in around full cost recovery for direct services for the Division, but did not account for the additional cost support provided by central services. When indirect support was included in the analysis cost recovery dropped to 59%. It is recommended that fees increase by 20% to be at a 70.8% cost recovery as detailed in **Appendix D**. All subsidized cost consists of remaining indirect support provided to the Building and Safety Division. As a result, there would be:

- an increase to 1123 fees (primarily tiered fee programs consisting of multiple lines), and;
- 1 new fee would be added.

---

## Golf

---

The Golf Course fund receives revenue from the San Dimas Canyon Golf Course and clubhouse leases. The ongoing expenditures are for utilities, audit services and incidental maintenance.

### Analysis

No cost analysis was done with the services and programs associated with the Golf Services. All fees are to remain as currently set as detailed in **Appendix D**.

---

## Public Works

---

The primary function of the Engineering Division is to promote the orderly development of the City of San Dimas by providing general engineering services to regulate the construction of municipal structures, city streets, sewage disposal, water supply and storm drainage facilities. Through regulation, the goal is to provide a high standard of construction quality and to preserve and protect public health, safety, and convenience.

The Engineering Division is responsible for the management of construction contracts and activities; management of contractual engineering services; development of Standard Designs of Common Engineering Structures; engineering and technical assistance to other departments; infrastructure grant procurement, monitoring, and reporting; maintenance of GIS data and different mapping and record systems; compliance with local, regional, state, and federal laws; development of staff in technical, organizational, and supervisory skills; chair and staff support to the Traffic Committee; and management of right-of-way activities.

The Engineering Division is responsible for handling all issues related to traffic in the City of San Dimas. Traffic improvements originate from many different sources including City projects, developer projects, and citizen requests. Engineering staff researches and responds to all citizen complaints and requests, which often include inquiries for stop signs, traffic signs, parking restrictions, and crosswalk additions and removals.

The Engineering Division reviews and inspects development proposals and compliance with city policies, procedures, codes, standards, and other governmental requirements relating to land subdivisions, grading, drainage, public improvement within the city right-of-way, and transportation matters. The Department is also responsible for the management, rehabilitation, and replacement of public improvements, such as water mains, sewer mains, storm drains, streets, traffic signals, etc. to provide continued reliable service to the community. Also, the Division is responsible for receiving bids and proposals for the development and construction of new public roadways, sidewalks, and overseeing projects that affect public property to protect and enhance the community's quality of life.

## Analysis

Willdan individually reviewed the services and programs associated with Engineering. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Engineering Services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that current fee levels are subsidizing the cost for most services. Staff has suggested reasonable fee adjustments to the fee schedule, and they are detailed in [Appendix D](#). As a result, there would be:

- 
- an increase to 26 fees;
  - 17 new fees would be added;
  - 3 fees would change from flat to actual cost, and;
  - 59 fees would remain as currently set.

## Appendix A – Total Allowable Cost to be Recovered

Below are the total allowable costs that may be recovered through User Fees; however, only a percentage of the total cost is realized as staff doesn't just work on services related to User Fees, but also work on an array of other City functions during the operational hours of the City. The amounts listed below will not reconcile to City budgets as costs that should not be included in overhead for personnel in the application of determining fully burdened hourly rates were excluded. Examples of these costs are capital, debt, monetary transfers, passthrough contract costs, and any other costs that is charged directly to the service requestor.

| 034: Housing Authority Successor Fund | 189,807                   | 36,155                                 | 19%               | 43%                   |

## Appendix B – Fully Burdened Hourly Rates

Below are fully burdened hourly rates of staff positions that provide for the services detailed in **Appendix D**. The FBHRs were used to determine the full cost of each service. They include the salary and benefit costs for each position as well as all applicable overhead amounts for each position. For positions in central service departments, such as the City Clerk and Finance, what is shown is the salary and benefit rate only, as the overhead of central service departments is recovered through the cost allocation plan. When a central service department position works on a fee or project in the purview of an operating department, the overhead rates of the operating department (shown in **Appendix A**) will be applied to that central service positions’ salary and benefit rate for full cost recovery. For any user fee service request that is outside the scope of the fees detailed in **Appendix D**, or for services for which there is no fee currently set, the City can charge up to the full cost of the FBHR for personnel involved.

## Appendix C – Department Cost Recovery

Below is the Department Cost Recovery. Cities typically track revenue and fee activity through broader service purpose or at the department level only, which limits the accuracy of projections on what affect individual fee changes will have on revenue. Data used in the analysis consisted of City expenditures and an average of actual revenues for FY 2022 and budgeted revenues for FY 2023.

### City of San Dimas - User Fee

#### Department Cost Recovery

| Department/Fund                    | Total Cost | Fee Revenue | Current Cost Recovery Percentage | Notes                                    |
|------------------------------------|------------|-------------|----------------------------------|------------------------------------------|
| 001: Administrative Services       | 1,300,827  | 25,000      | 2%                               | Only including Admin Fee Rev             |

## Appendix D – Cost Recovery Analysis

---

The following tables provide the results of the analysis, resulting full cost recovery amount, and recommended fees. For fees, services, and penalties in which the full cost, existing fee and suggested fee is listed as “NA”, the amount or percentage was not calculable based on cost data or variable fee structure. This is most common when either the current or the suggested fee includes a variable component that is not comparable on a one-to-one basis, a full cost was not calculated (for penalties, fines, market-based fees, or items not included in the study), or when there is not a current fee amount to compare against.

All services and fees analyzed as part of this study fall under one or multiple categories one through five of the exemptions defined in Proposition 26. As such a cost analysis was performed to calculate the estimated reasonable full cost of each service, and suggested fees are recommended at or below those amounts. Estimated reasonable full costs were calculated based on City expenditures and time estimates.

To provide a thorough list of all fees and services, the schedules also include items that were not part of the scope of this study. Examples of such items could be utility rates, taxes, in-lieu fees, and developer impact fees.

| BE-20    | Category I | Electrical         | For theatrical-type lighting fixtures or assemblies                                                                                                                                                                                                                                                                                                                                                            | 3.00               | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$5.09    | 29%       | \$3.60        | \$0.60  |
| BE-21    | Category I | Electrical         | For fixed residential appliances or receptacle outlets for same, including wall-mounted electric ovens, counter-mounted cooking tops, electric ranges, self-contained room, console, or through-wall air conditioners, space heaters, food waste grinders, dishwashers, washing machines, water heaters, clothes dryers, or other motor-operated appliances, not exceeding three (3) horsepower (HP) in rating | 12.80              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$21.70   | 29%       | \$15.36       | \$2.56  |
| BE-22    | Category I | Electrical         | For any appliance installed in a non-residential occupancy and not exceeding three (3) horsepower (HP), kilowatt (KW), or kilovolt-ampere (KVA) in rating, including medical and dental devices, food, beverage, and ice cream cabinets, illuminated showcases, drinking fountains, vending machines, laundry machines, or other similar types of equipment                                                    | 18.60              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$31.54   | 29%       | \$22.32       | \$3.72  |
| BE-23    | Category I | Electrical         | For motors, generators, transformers, rectifiers, synchronous converters, capacitors, industrial heating, air conditioners and heat pumps, cooking or baking equipment, and other apparatus, with a rating of - Rating over 3 hp and not over 10 hp                                                                                                                                                            | 24.00              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$40.69   | 29%       | \$28.80       | \$4.80  |
| BE-24    | Category I | Electrical         | For motors, generators, transformers, rectifiers, synchronous converters, capacitors, industrial heating, air conditioners and heat pumps, cooking or baking equipment, and other apparatus, with a rating of - Rating over 10 hp and not over 50 hp                                                                                                                                                           | 55.40              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$93.94   | 29%       | \$66.48       | \$11.08 |
| BE-25    | Category I | Electrical         | For motors, generators, transformers, rectifiers, synchronous converters, capacitors, industrial heating, air conditioners and heat pumps, cooking or baking equipment, and other apparatus, with a rating of - Rating over 50 hp and not over 100 hp                                                                                                                                                          | 103.60             | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$175.66  | 29%       | \$124.32      | \$20.72 |
| BE-26    | Category I | Electrical         | For motors, generators, transformers, rectifiers, synchronous converters, capacitors, industrial heating, air conditioners and heat pumps, cooking or baking equipment, and other apparatus, with a rating of - Rating over 100 hp                                                                                                                                                                             | 171.20             | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$290.28  | 29%       | \$205.44      | \$34.24 |
| BE-27    | Category I | Electrical         | Busways: For cable trays, trolley and plug-in type busways, each 100 feet or fraction thereof                                                                                                                                                                                                                                                                                                                  | 31.50              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$53.41   | 29%       | \$37.80       | \$6.30  |
| BE-28    | Category I | Electrical         | For signs, outline lighting systems or marquees supplied from one branch circuit                                                                                                                                                                                                                                                                                                                               | 46.80              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$79.35   | 29%       | \$56.16       | \$9.36  |
| BE-29    | Category I | Electrical         | For additional branch circuits within the same sign, outline lighting system or marquee                                                                                                                                                                                                                                                                                                                        | 15.50              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$26.28   | 29%       | \$18.60       | \$3.10  |
| BE-30    | Category I | Electrical         | For services, switchboards, switchboard sections, motor control centers and panelboards of 600 volts or less and not over 399 amperes in rating                                                                                                                                                                                                                                                                | 46.80              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$79.35   | 29%       | \$56.16       | \$9.36  |
| BE-31    | Category I | Electrical         | For services, switchboards, switchboard sections, motor control centers and panelboards of 600 volts or less and 400 amperes to 1,000 amperes in rating                                                                                                                                                                                                                                                        | 91.70              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$155.49  | 29%       | \$110.04      | \$18.34 |
| BE-32    | Category I | Electrical         | For services, switchboards, switchboard sections, motor control centers and panelboards over 600 volts or over 1000 amperes in rating                                                                                                                                                                                                                                                                          | 195.20             | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$330.98  | 29%       | \$234.24      | \$39.04 |
| BE-33    | Category I | Electrical         | For electrical apparatus, conduits and conductors for which a permit is required but for which no fee is here inset forth                                                                                                                                                                                                                                                                                      | 78.60              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$133.27  | 29%       | \$94.32       | \$15.72 |
| BE-34    | Category I | Electrical         | For each extra inspection resulting from defective workmanship or materials                                                                                                                                                                                                                                                                                                                                    | 39.80              | Plus Issuance Fee               |       | LACC-E   | SDMC 15.020.020 | \$67.48   | 29%       | \$47.76       | \$7.96  |
| BE-35    | Category I | Electrical         | For inspection of electrical equipment for which no fee is herein set forth and for emergency inspections for the time consumed - For each hour, or fraction thereof                                                                                                                                                                                                                                           | 131.60             | Per Half Hour Plus Issuance Fee |       | LACC-E   | SDMC 15.020.020 | \$223.14  | 29%       | \$157.92      | \$26.32 |
